

Acadia National Park Vegetation Map Class for Mixed Conifer - Deciduous Woodland

The map class "[Mixed Conifer - Deciduous Woodland](#)" is composed of the following vegetation associations, each described separately:

- [Spruce - Fir Rocky Summit](#)
- [Early Successional Woodland/Forest](#)
- [White Pine - Red Oak Bedrock Glade](#)

The Mixed Conifer - Deciduous Woodland map class (MW) is a highly variable map class encompassing woodlands with a mixture of conifers and deciduous species, each reaching >25% relative canopy. Canopy cover is <60%. MW occurs on bedrock.
